I am an enthusiastic and dedicated undergraduate student pursuing a degree in Informatics. My academic pursuits have equipped me with a solid foundation in programming languages, algorithms, and data structures. Since I have worked on several projects in small teams with my friends, I have become familiar with several programming languages such as C, Python, and Java. As I embark on this educational adventure, I find myself constantly inspired by the limitless possibilities that the world of computer science offers.

WORK EXPERIENCE

Mathematics Tutor / Disciple Course, Kediri

08/2019 - 08/2022

Working as a math tutor helped me acquire several skills such as networking, public speaking, and time management. I learned a lot how to handle students with different motivations and abilities which makes me have to adjust my approach. Another skill I got is priority scale, sometimes when exam and teaching schedules collide, I have to prioritize my exams and have to be able to organize my time well.
